

LIGHTING THE WAY For Growing Communities

Santee Cooper welcomed 7,831 new customers in 2023, a record year for customer growth. We're investing in resources to reliably power your growing communities now and in the future including:

- Adding new natural gas and solar power
- Building new transmission lines (the "interstates" of the electric grid.)

Our reliability ranks in the top 2% of utilities nationwide, and we'll continue to provide you with the exceptional service you expect as we move forward.

Read about our new natural gas generating station lighting up our grid and the planned transmission line that will deliver power to some of our fastest growing neighborhoods.

We Serving Our Community

Santee Cooper team members volunteered over **25,000 hours** in the communities we serve in 2023! From blood drives to building community recreation facilities, we were proud to stand with you and work to improve the quality of life for all South Carolinians.

Now in 2024, we're ready to get back out there! If you have a nonprofit volunteer opportunity you want us to consider, please email our Manager of Community Relations at brandy.incorvia@santeecooper.com.

Thank you for allowing us to serve you!
